Who is working on ant physiology? There is room to improve international collaborations.

Brenda Sofía VIROLA-V, Jeancarlos ABREGO, Dilma CASTILLO, Eleodoro BONILLA & Dumas GÁLVEZ

Table S1. Frequency of species studied between 2015-2019 per geographical region, as compared to the total number of species recorded in that particular region.

Geographical region	Species studied during 2015-2019	Number of species	% of studied species
Africa	71	3985	2
Asia	112	4994	2
Europe	145	899	16
Central America	97	1961	5
South America	104	2883	3
North America	204	909	22
Oceania	97	1676	6
